Table 18.1 Predicted and observed results of skin receptor experiment.

(During the lab session, we misinterpreted the table and missed the fact that for the right columns we were supposed to record exact measurements. We understood that all columns were going to be subjective measurements like the left one. So, I can't do anything about that now as I wasn't the person recording the data.

Test Area on Skin	Predicted Results (close, medium, far)	Observed Results (measured distance, mm)	
		Test Subject 1	Test Subject 2
Scalp			
Forehead			
Cheek			
Lips			
Chin			
Nose			
Neck			
Upper arm			
Lower arm	close	close	far
Palm			
Elbow			
Back of hand	medium	close	close
Fingertips	close	close	close
Back			
Kneecap			
Calf			
Ankle
